Curriculum Map (Links to geography programmes of Study 2014) Locational knowledge Place knowledge Human and physical geography Developme What is an Use on Inter	t did we learn in Y7 geography? It key knowledge ideas do we remember? Ision tool Wledge organiser/mind-map/flash Is) It is poverty? Grace's story It is my life like? - own survey It is a typical day in my life like? - diary It is life like for someone living in It in Ghana? -a day in the life of Grace It does my life compare to someone living It is Ghana? (comparison)	Autumn 2 POVERTY AND DEVELOPMENT Ghana vs UK investigation (exploration) Where are Ghana and the UK located? What are the main human and physical features of each country? What do economic and social indicators of development tell us about the level of development in each country? How has the level of development changed over time in each country (since 2001?) What is the way of life like in each country? How is the level of development different within each country? (extension) Why is Ghana so poor and underdeveloped? (economic, historical, environmental, social and political factors) Why is the UK wealthy and developed? (economic, historical, environmental, social and political factors) How is the development of one country linked to other places? (interdependence) What can we conclude about Ghana's current level of development/change over time? What can we conclude about the UK's current level of development/change over time?	Types of Hazard What is a natural hazard? How can we classify natural hazards? The structure of the earth How is the earth structured? What is each layer of the earth like? What would a machine need to be like to get to the centre of the earth? Plate Tectonics What are tectonic plates? What is the global distribution of earthquakes and volcanic eruptions? (GIS) Why are earthquakes and volcanoes located where they are? What happens at a destructive boundary? What happens at a constructive boundary? What happens at a conservative boundary? Volcanoes What are volcanoes and what are they like?	TECTONIC HAZARDS Continue Mt St Helen's exploration Where is Mt St Helens located? What was Mt St Helens like before 1980? What type of plate margin is Mt St Helens located on and what is happening at this margin? (Cause) What happened during the build-up to the Mt St Helens eruption of May 1980? (Cause) What happened during the eruption and why did this happen? (Cause) What was Mt St Helens and the surrounding area like after the eruption? (Impacts) How was the eruption linked to other places around the globe? (Interdependence) Is Mt St Helens likely to erupt again? Earthquakes What are earthquakes? What are earthquakes measured? What are the impacts of earthquakes on people and the environment?	Coasts introduction What is a coast? How do people use the coast? Why are coasts important? Coastal Processes and Landforms What is a coastal process? What are the types of erosion? What are the coastal transportation processes? What is longshore drift? What is deposition? What is deposition? What coastal landforms are there? Which are erosional landforms and which are depositional landforms? How are headlands and bays formed? Old Harry Rocks Exploration What is Old Harry and where is he located? How was Old Harry formed? What are the stages in the formation of Old Harry and his wife?	CHINA Location and Physical geography of China Where is China located? What and where are China's natural barriers? The Human Geography of China Choice of geographical ideas to investigate Changing China - How life is changing, is it the same for everyone? Beijing - What is life like in Beijing? Rural China - What is life like in rural China? China and the environment - How is development affecting the environment? China and the rest of the world - What links does China have to the rest of the world? China's Population Where do people live in China and why?
